Handheld Radiation Detection Systems from Berkeley Nucleonics Exclusive Representation in New England by ETA Associates

Peabody, MA – ETA Associates (a division of Safety Inc.) recently signed an exclusive representation agreement with Berkeley Nucleonics of San Rafael, CA for their handheld radiation detection systems. These ANSI compliant Isotope identifiers and radiation pages (PRD) can be customized to meet the most demanding applications. BNC's radiation detection products are popular for detection, dosimetry, and isotope identification. Analytical products offer real time medical, industrial, SNM, and NORM nuclear isotope identification.

Berkeley Nucleonics' products include the SAM 940 Defender/Revealer, a handheld isotope identifier; the 907 palmRAD Nuclear Radiation Meter which discloses the presence of radioactivity and ensures personal health and safety; and their line of handheld pagers for Gamma, Gamma & Neutron, Gamma/Neutron with Identification, and Dosimetry. They offer affordable options for HazMat teams, firefighters, first responders, and border protection personnel.

Joel Myerson, president of ETA Associates adds, "The handheld detection products offered by Berkeley Nucleonics will fill a niche in our product line and will prove invaluable to hospitals, municipalities, and manufacturers throughout New England. We chose to develop a partnership with Berkeley Nucleonics due to the quality of their products and established leadership in radiation detection."

ETA Associates is an independent Sales Agency providing technical sales and service to the process control, pollution control, quality control, environmental control, industrial hygiene/safety, HVAC, and OEM markets; primarily in the product area of analytical instrumentation, related components, systems and environmental chambers - since 1971. With this product line specialty of analytical instrumentation and related components as well as environmental chambers, our marketplace concentration includes: manufacturing organizations, power utilities, consulting and engineering firms, government agencies, municipal and private water utilities, universities, R & D facilities, hospital and related medical facilities. ETA Associates is an operating division of Safety Inc. of Peabody MA., New England's only full line distributor of both personal protective equipment (ppe) and instrumentation.

Berkeley Nucleonics Corporation (BNC) has a 45-year history providing precision electronic instrumentation for test, measurement and nuclear research. It is based in San Rafael, CA.
